

# THERMAL MANIKIN - SUBMERSIBLE **NEMO/SHEMO**

Thermetrics submersible manikins, offered in male (Nemo) and female (Shemo) body forms, are constructed as fully sealed aluminum manikins with embedded heating and thermistor sensor elements. All heating and fluid control electronics are inside the manikin for maximum accuracy and easy maintenance. This fully waterproof design was developed using advanced CAD digital modeling, and is rated for immersion testing to depths of 10 feet (3 meters). Nemo/ Shemo is fully jointed, providing motion at the ankles, elbows, knees, and hips to allow virtually any possible body pose. Joints feature adjustable friction settings, which maintain their watertight integrity in any pose.

All Nemo/Shemo systems are complete, ready-to-use instruments and include the manikin, control electronics, laptop PC, and our exclusive ThermDAC control software. Just add your own climate chamber/ water tank for a comprehensive testing solution.
